From Library Journal

Cone's comprehensive perspective on musical matters derives from his experience not only as writer and theorist, but also as composer and performer, and from his wide-ranging interest in and knowledge of other arts. These 18 influential essays--the earliest dating from 1954, the latest only now published--ably represent Cone's abiding interests. Grouped into three areas, the essays discuss methodologies of analysis and criticism, music aesthetics, the relationship between music and words, the compositional practice of 19th- and 20th-century masters from Beethoven to Webern, and the inseparability of musical form from musical expression. The value of Cone's literate, readable work lies in its synthesizing and unifying nature. Strongly recommended not only for music but also for humanities collections.
