Always changing

By xaqbazit

I am a comic fan and picked this up on the idea that if Peter David found something interesting to write about here I would like to read it. I am a casual Star Trek Next Generation and Deep Space Nine fan and remembered these characters from there. The story itself was great because every time I thought I had figured out the genre IE: Romance, action, science fiction, it changed. The story really is in 3 parts and changes genre in a way that is fulfilling the expectation of each, as it progresses - which I found amazing. The story does delve a bit too far into being gratuitous, some of the one liners and set up for a scene are a bit overt and make you groan. It might be that Diana's race were not accustomed to humans but they didn't tip toe around any of the issues and didn't really sound like how people talk. No one impied or infered anything, they just came out and said what they meant. Character repeadidly use the phrase "What in hell" instead of "what in the hell" which I found irritating. But the narrator, who played his character on the show, did a great job, even of immitating Pickard at time, which was strikingly good. Though he does read slower than most narrators his inflections kept me interested even though there is minimal sound/music fx. All together it was much better than I anticipated to get from my first Star Trek audio book.
