In what promises to be the most acclaimed new voice of spirit, man and nature since Castaneda, the famous "Pine Barrens" tracker reveals how he acquired the skill that has saved dozens of lives - including his own. His story begins with the chance meeting between an ancient Apache and a New Jersey boy. It tells of an incredible apprenticeship in the Wild, learning all that is hidden from modern man...

Maybe a little "literary license" but, by and large, true!

By Amazon Customer

Having read some of the earlier reviews I thought that it might be enlightening to provide a little bit of background for "The Tracker" and its author, Tom Brown, Jr.

I have hunted and fished and loved the outdoors all of my life. When I first read "The Tracker" I was immediately fascinated with the thought that there still might be a master tracker and survivalist somewhere in the world and that if even 50% of "The Tracker" was true, I had to find this guy!!! First of all, though, I searched out and read everything I could by Tom Brown and began to realize just how little I knew about the "real" world. I finally contacted the publisher of "The Tracker" and was directed to a P.O. Box number in New Jersey. I wrote to Tom about the possibility of learning from him and was rewarded by being informed that he operated an outdoors school. I began to attend classes there and judged for myself if Tom was the person he claimed. My conclusion is-- that he can do everything he claims (and I have seen him do some stuff that just leaves you shaking your head). Countless newspaper stories in New Jersey and elsewhere documenting his ability to find lost people (some of whom didn't necessarily want to be found) attest to his tracking ability. His favorite phrase seems to be, "Prove me wrong!". He is confident of his ability and genuinely wants you to be able to do the same things he does. Don't let the fact that our lives are pretty much consumed by the day to day struggle to survive blind you to the fact that there is a fantastic world out there and try to remember that you once knew about it when you were young and your mind was open. "The Tracker" is a great read that you can take as fiction OR fact and enjoy equally!! Be careful, though, because it may have the same effect as the little pill in "The Matrix" and you may "wake up". In any case, it will at least remind you of how life used to be when you were young and everything was fascinating!!!

A Wonderful and Enjoyable Resource on Tracking, Wilderness Survival and More

By Dick N.

Some reviewers have been critical or skeptical of this book and/or it's author. My latest purchase of this book was as a gift, for a young relative who's going thru training for position as a Game Warden. My own copy was purchased many years ago, after learning of it thru other boys in my sons' Boy Scout troop at the time. There were no reviews by others that biased my view or appreciation of it at that time.

I read the book thru cover-to-cover, and learned many things - about 'how to track', basic wilderness survival considerations and methods ...and about life from 'different perspectives.' Whatever criticisms some reviewers recorded in Amazon many years later, I didn't experience or consider them worth remembering. Some of the 'promotional wording' on the cover really doesn't relate to what I got out of the book. This is just too good - as instruction, as appreciation, and even just basic enjoyment.

One of the most significant 'lessons' was what he described as Stalking Wolf's (Grandfather's) primary (or only?) teaching method. Unlike many "how to" books (like the typical Boy Scout Manual of the time), Grandfather never 'told them' to "do this or do that" in response to some situation. What he did (entirely, it seems, from my memory of reading it long ago) was to ask questions ...which provoked the boys to use their powers of observation and thinking processes to learn for themselves about the situations he placed them in, or pointed them toward.

If someone is interested in learning about basics of tracking and/or wilderness survival, I don't think this is a resource they should overlook ...unless they're already very advanced from other 'hands on' training (maybe Special Forces or Ranger training? I never experienced those myself, so can't compare it).

We did a chapter a day and found it the greatest adventure book ever

By jacqueline m leonard

I found this at the library 20 years ago and read it to our 2 young daughters. We did a chapter a day and found it the greatest adventure book ever. After reading this book, I went on to read all of the books Tom Brown wrote concerning his further adventures and instruction from Grandfather in the natural and spiritual order.
